

CONTENTS

	FOREWORD	5–7
1	WHY DO WE NEED THE ENERGY PERFORMANCE OF BUILDINGS DIRECTIVE?	8–19
1.1	Background	8
1.2	What does the EPBD actually say?	13
1.2.1	Calculating energy performance	14
1.2.2	New buildings	16
1.2.3	Large buildings	17
1.2.4	Inspections	18
2	HOW MANY OTHER DIRECTIVES ARE THERE?	20–27
2.1	The Directive on energy labelling of electric refrigerators and freezers	21
2.2	The Directive on cogeneration of heat and power	22
2.3	The Directive on ecodesign requirements	22
2.4	The Directive on energy end-use efficiency and energy services	23
2.5	The Agreement on energy-efficiency labelling programmes for office equipment	26
3	TO WHICH TYPES OF BUILDINGS DOES THE EPBD APPLY?	28–40
3.1	General aspects	28
3.1.1	Exceptions	28
3.1.2	Methods for calculating energy performance	29
3.1.3	Minimum requirements in new and existing buildings	29
3.1.4	Energy certification of buildings	30
3.1.5	Buildings with boilers and air-conditioning systems	31
3.2	Sweden	32
3.2.1	Energy certification of buildings	32
3.2.2	Boilers and air-conditioning systems	34
3.2.3	The building stock in Sweden	34
3.3	Denmark	35
3.4	UK (England and Wales)	37
3.5	Czech Republic	38
3.6	Austria	40
4	ENERGY CERTIFICATION OF BUILDINGS	41–58
4.1	What does the Directive say?	41
4.2	Sweden	42
4.2.1	Buildings	43
4.2.2	Energy certification	44
4.2.3	Classification	46
4.2.4	Independent expert	49
4.2.5	Registering energy certificates	50
4.2.6	Regulatory board	50

4.3	Denmark	50
4.4	UK (England and Wales)	52
4.5	Czech Republic	54
4.6	Austria	56
5	WHAT ARE YOU ALLOWED TO DO YOURSELF?	59–74
5.1	Procurement and execution of energy certification services	60
5.2	Checklists and improvement recommendations	61
5.2.1	Heating systems	64
5.2.2	Comfort cooling systems	66
5.2.3	Ventilation and air-conditioning systems	68
5.2.4	Regulation and monitoring systems	70
5.2.5	Systems used by tenants	71
5.2.6	The building envelope	74
6	HOW LONG HAVE YOU GOT?	75–87
6.1	Sweden	75
6.1.1	Building regulations stipulating energy performance requirements	75
6.1.2	New regulations for rational use of energy	75
6.1.3	Energy certificates	76
6.1.4	Air-conditioning systems and boilers	77
6.2	Denmark	78
6.2.1	Building regulations stipulating energy performance requirements	78
6.2.2	Energy certificates	79
6.2.3	Boilers, heating systems and air-conditioning systems	81
6.3	UK (England and Wales)	82
6.3.1	Building regulations stipulating energy performance requirements	82
6.3.2	Energy certificates	83
6.3.3	Air-conditioning systems and boilers	84
6.4	Czech Republic	85
6.4.1	Building regulations stipulating energy performance requirements	85
6.4.2	Energy certificates	85
6.4.3	Air-conditioning systems and boilers	85
6.5	Austria	86
6.5.1	Building regulations stipulating energy performance requirements	86
6.5.2	Energy certificates	86
6.5.3	Air-conditioning systems and boilers	87
7	WHO'S IN CHARGE?	88–90
7.1	Sweden	88
7.1.1	Boverket is responsible for drafting the regulations and collecting data	88
7.1.2	Local authorities are the supervisory bodies	88
7.2	Denmark	89

7.3	UK	89
7.4	Czech Republic	90
7.5	Austria	90
8	WHAT HAPPENS IF YOU DON'T COMPLY?	91–97
8.1	Sweden	91
8.1.1	Will property owners be fined?	92
8.1.2	Who is going to check that the certificate is properly displayed?	92
8.1.3	How large should the fine be?	93
8.1.4	Selling a building without an energy certificate	93
8.2	Denmark	94
8.3	UK (England and Wales)	94
8.3.1	Dwellings	95
8.3.2	Commercial buildings	95
8.3.3	Display Energy Certificates (DECs) for public buildings	96
8.3.4	Inspection of comfort cooling systems rated over 12 kW	96
9	THE EPBD – MORE ON THE WAY	98–99
	EPILOGUE	100–101
	ENERGY LABELS AND CERTIFICATES	103–113
	COLOPHON	115
